Subject: Savings By Design Participation

Dear Select Rep:

I would like to participate in the Savings By Design program. I understand that Savings By Design is a statewide nonresidential new construction and renovation/remodel energy efficiency program, funded by utility customers through the Public Purpose Programs surcharge. I am interested in improving the energy efficiency of my project using design assistance and financial incentives available through the program.

I agree to provide, or have my design team provide, required documentation, as requested. I am willing to consider efficiency recommendations that will improve the performance of my project significantly beyond Title 24 (or other baseline) requirements.

I understand that participation in the Savings By Design program is voluntary, and that I am under no obligation to modify the design or construction of my building based on resulting recommendations. I also understand that I will receive financial incentives only if I complete an agreement, my eligibility is established by the utility, the performance of my building meets program requirements, and then only after the energy efficiency strategies are installed and verified.

Sincerely,
